Finnentrop-Sauerland, Mai, 2002

... Kameras ... überall Kameras ... auf jedem Bahnsteig, auf jedem großen Platz, in jeder Ecke - völlig egal, in welcher Stadt ... es gibt bereits ganze Stadtteile, die komplett kameraüberwacht sind ... diese sollen dem völlig verängstigten Bürger das Gefühl vorgaukeln, in absoluter "Sicherheit" zu "leben" - als wäre das jemals möglich ... in so mancher Telefonleitung knackt es 24 Stunden am Tag und ein merkwürdiger Wiederhall macht das Gespräch zu einem wirklichen Erlebnis - natürlich sind dieses technische Störungen völlig veralterter Leitungen ... perverse "schlaue" Forscher haben vor kurzem begonnen, Menschen Mikro-Chips unter die Haut zu pflanzen - selbstverständlich aus rein medizinischen und wissenschaftlichen Gründen! ... fast jeder Neuwagen wird heute mit einem satellitengesteuerten Navigationssystem ausgeliefert, welches geschultem Personal jederzeit die genau Position des Fahrzeugs mitteilt ... Post erreicht einige Leute bereits geöffnet und nur stümperhaft wieder zusammengeklebt - da war dann wohl eine massive Störung in der Verteilermaschine, oder so ... fast wöchentlich werden weltweit neue, immer hochauflösendere Satelliten ins Weltall geschossen - ausschließlich um den "globalen Terrorismus" im Auge zu haben! ... im Rahmen von Raster-Fahndungen nach Schwerkriminellen werden massenhaft Gentests und Fingerabdrücke von fast jedermann genommen - selbstverständlich werden diese nach erfolgloser Abgleichung ordnungsgemäß vollständig vernichtet! ... Polizei und BGS durchsuchen täglich Wohnungen, Autos, Rucksäcke, etc.- vielleicht auch schon morgen wieder Deinen?
.... man, was haben wir ein Glück, nicht in einem Überwachungsstaat zu leben!
Wahnvorstellung oder längst Wirklichkeit? Kann sein, dass ich ein wenig unter Paranoia leide und einigen von Euch das mal wieder alles kiffe-egal ist ... ich zumindest fühle mich jetzt schon oft in meiner Freiheit massiv eingeschränkt, überwacht, belauscht und beobachtet ... Fakt ist, dass das Thema "Innere Sicherheit" dieses Jahr mit wahlentscheidend wird. Leute wie Schill und Stoiber rufen nach einer "starken Hand" und massiven Gesetzesverschärfungen (auch für den Graffiti Bereich) und Ihr wollt (wieder) nicht wählen gehen?

Finnentrop-Sauerland, May 2002

...cameras...cameras everywhere ... on every railway station, in every crowded place, on every corner - in every town. There are already whole parts of cities under camera surveillance. This gives the impression of complete safety to the very frightened citizen, as if that were possible ... it crackles in vast numbers of telephone lines for 24 hours a day and a strange echo makes conversation a real experience. These, of course, are only technical faults of old fashioned telephone lines. Perversely shrewd scientists have recently begun to implant micro chips under people's skins ... assuredly for purely medically scientific reasons! Almost every new car will now be equipped with a satellite navigation system, which can provide the authorities with information of the whereabouts of the vehicle at anytime. Some people's post arrives already opened and only sloppily resealed ... well there must have been a fault in the sorting machine. Worldwide almost on a weekly basis new, high resolution satellites are being shot into the sky. - but only to keep check on "Global Terrorism"!!?? In the hunt for criminals genetic tests are being carried out and finger prints being taken on a massive scale... assuredly will all these be completely destroyed after negative testing. Police and customs search houses, cars, rucksacks, etc. daily - maybe yours tomorrow??!
... hey, we are so lucky not to be living in a "big brother state"!
Delusion or reality? Perhaps I am suffering from paranoia, and some of you don't care about any of this.
I at least already feel myself severely restricted in my freedom, controlled, overheard, watched. Fact is, that the issue of civil security will be decisive in the coming election. People like Schill and Stoiber call for a " strong arm" and much stricter laws (concerning graffiti as well) ... and you are not going to vote (again) ?

Widerstand braucht Phantasie

ons

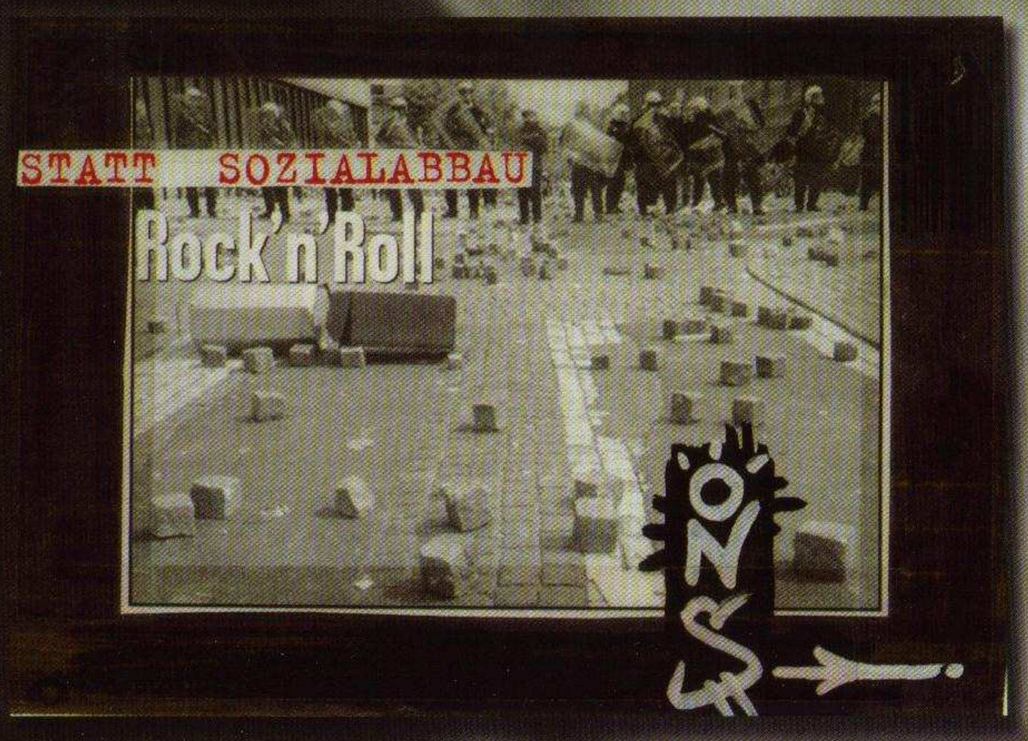

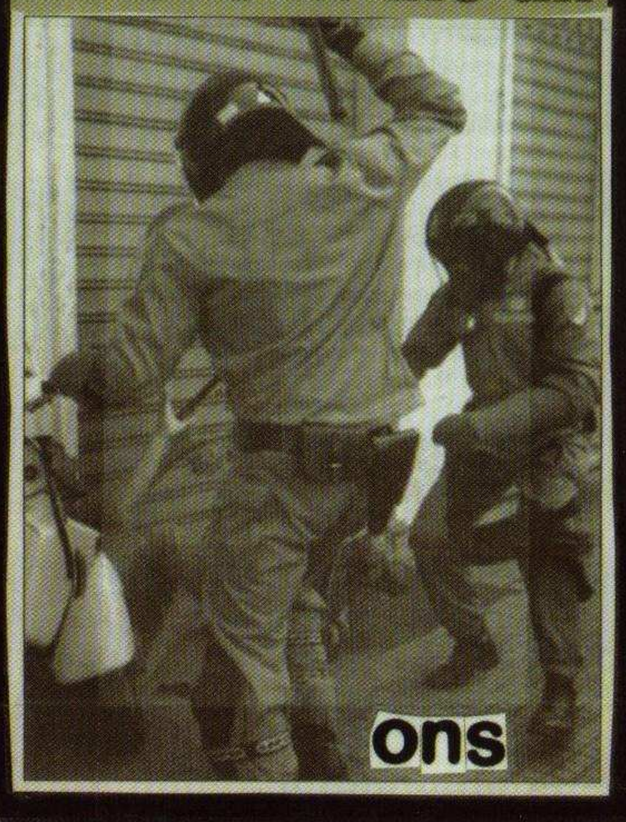

"... auch wenn unsere Arbeiten auf den ersten Moment sehr politisch erscheinen, liegt der Schwerpunkt in der ästhetischen Umsetzung. Es soll auffallend und interessant wirken - sauber wie Werbeplakate, um dann bei näherer Betrachtung ins Gesicht zu schlagen! Klar sind wir durch unser Tun auch politisch, aber das ist ein Mensch, der kein Busticket kauft, auch!"

" ... die Motivation ist simpel: Es geht bei unseren Arbeiten (der Schwerpunkt liegt bei Stickern und Plakaten) um kleine aber feine Nadelstiche der vor sich hintrottenden Menschen ! ..."

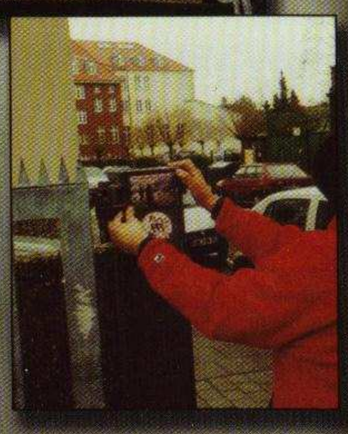

" Widerstandsbewegung : Organisierte Gegnerschaft gegen eine als tyrannisch und unrechtmäßig empfundene Herrschaft. Passiver Widerstand : Setzt zum Beispiel zivilen Ungehorsam, Demonstrationen und politische Streiks ein."
(Duden - Lexikon in 10 Bänden)

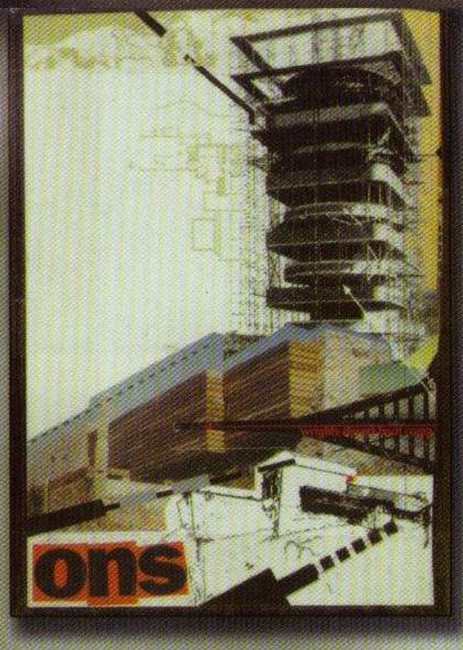

ons

"... es soll amüsant provozieren und wenn wir Glück haben, sogar ein wenig zum Nachdenken anregen. Auch wenn die Mittel, die wir uns dafür ausgesucht haben, im ersten Moment unbedeutend erscheinen. Klar ist ein Wholecar provozierender fürs Auge, aber schon das Gesichtverziehen eines Otto-Normal-Bürgers, der O.N.S. Stuff wahrnimmt, ist ein 1 : 0 für uns ! Wie sagt der Mensch so schön: Nur der Moment zählt ! ..."

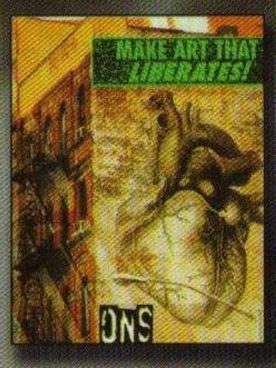

"... wir denken, Aufkleber, Plakate usw. sind eine gute Ergänzung zum "Standard-Graffiti", da es noch einfacher anzubringen ist. Aber es steht außer Frage, dass ein guter Panel mit Message unseren ganzen Shit einpackt ! ..."

"... es liegt immer im Auge des Betrachters, was er als politisch ansieht und für würdig erachtet, anzugreifen. Die Auswahl an Dingen, die scheiße sind, ist gewaltig - Parteien eingeschlossen ! Dennoch haben wir nichts mit der "Mao-Bibel" oder den "Che-Groupies" gemein ! ..."

ARTUNIQUE

Graffiti Art

Jede Nacht verläßt
Sie ihr Bett
um zu träumen

Dabei massiert sie
geheim die Rosen
mit Öl ein

verliebt sich
immer wieder
auf's neue

maskiert sich um
anonym mit dem
Reh zu sprechen

und stiehlt die
Tränen der Bäume.

Pennt aber trotz
des langen Schlafes
jeden Morgen beim
Frühstück wieder ein
